

RadioNet

ADVANCED RADIO ASTRONOMY IN EUROPE

RadioNet3 **coordinates Europe's leading radio astronomy institutions** to **support scientific research** by all European astronomers.

Transnational Access offers **open observing time** on Europe's **most powerful** radio telescopes.

Networking Activities foster **interaction and collaboration** among astronomers and engineers, through **workshops, conferences and training events**, and also providing **travel grants**.

Joint Research Activities stimulate and **fund engineering research** and the **development of new data processing and analysis methods**.

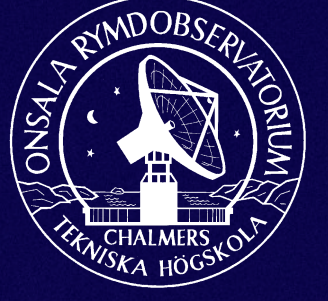

RadioNet3 is funded by the **European Commission** under the **Seventh Framework Programme (FP7)**, Contract no. 283393.
